DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 7, 8 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Baiyor et al. (U.S. Patent No. 6,714,636).

Regarding claims 1 and 8, Baiyor et al. teach a method and apparatus of alerting a called telephone station comprising the steps of: defining, for a calling customer, an enhanced alerting list and a telephone number for calling for said enhanced alerting list (column 5, lines 4-12);

Art Unit: 2614

responsive to said customer dialing said telephone number, alerting the telephones of the telephone numbers on said enhanced alerting list (column 5, lines 13-23).

Regarding claims 7 and 14, Baiyor et al. further teach the method and apparatus wherein one of the numbers on said enhanced alerting list is that of a paging service for paging a called customer (column 10, lines 26-31).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-6 and 9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baiyor et al.

Regarding claims 2-6 and 9-13, Baiyor et al. fail to teach the method and apparatus wherein alerting telephones in the list in parallel and/or sequentially with a predetermined number rings. However, Official Notice is taken that both the concept and the advantages of providing ringing a predetermined number rings of a telephone number in the list in sequence or ringing the plurality of telephone numbers in parallel are well known and expected in the art. It would have been obvious to have included the techniques of ringing in Baiyor et al. as these techniques are known to save time for the caller when ringing in parallel is used and/or save the traffic in the network when ringing in sequence is used.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brennan et al. (U.S. Patent No. 5,329,578) teach a Personal communication service with mobility manager.
